SEP STANDARD EMAIL PROTECTION

Stop the Phish

DESCRIPTION

A cost-effective solution named SpamTitan to provide an Email security baseline.

SpamTitan is used to work with mailboxes using Office365 to screen out Phishing emails before they get in your mailboxes

CHARGING

Scope:

All BU staff with an email

Type of Service:

Phishing protection

Charging Method:

based on unit of mailbox (actual usage)

AEP

ADVANCED EMAIL PROTECTION

Stop the Phish

DESCRIPTION

Powerful solution from microsoft designed to provide advanced protection against sophisticated email attacks which supports organization throughout the attack cycle.

not just screen and prevent but also investigate and stop the spreading

CHARGING

Scope:

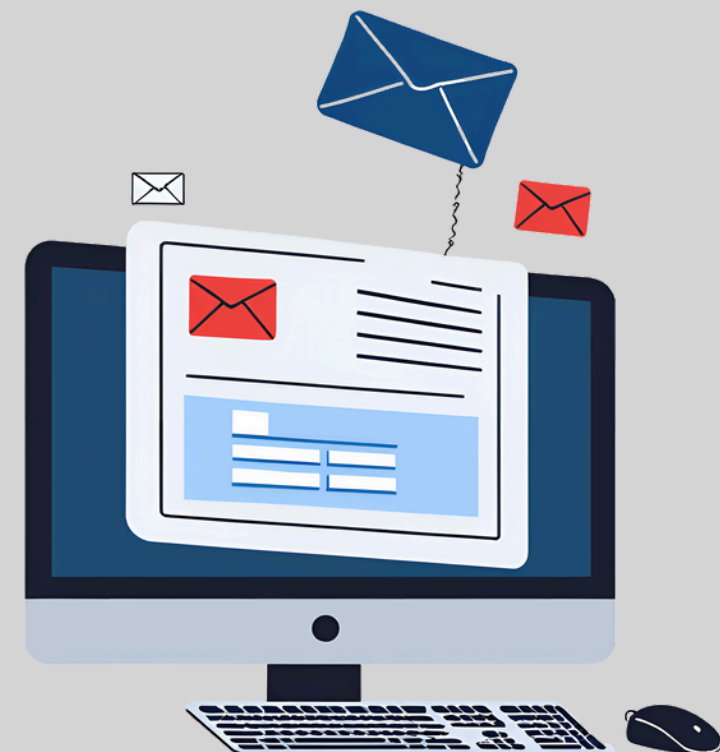

Job function, JG17+, PA/EA, sensitive app & targeted users

Type of Service:

Phishing protection

Charging Method:

based on unit of mailbox (actual usage)

MDR

MANAGE DETECTION & RESPONSE

Keeping TAs Out

DESCRIPTION

The solution combines expert-driven EDR for proactive device protection, SIEM for behavior-based threat detection, SOAR for automated response, and open-source tools for threat investigation. A talented team of dedicated CISO security experts monitors, detects, and mitigates attacks.

Additionally, this expert team delivers tailored threat analysis and response strategies, handling the impacts and challenges of any potential cybersecurity incidents for your organization.

CHARGING

Scope:

any modern operating system

Type of Service:

managed detection & Response

Charging Method:

based on unit of device (actual usage)

ZTNA

ZERO TRUST NETWORK

Stop Intrusions

DESCRIPTION

Solution designed to ensure that users are fully identified and authorized to access web applications. This solution will provide robust security even to legacy applications that were not designed to comply with modern requirements, significantly reducing the risk of unauthorized access, data breaches, and other security incidents related to privileged accounts

CHARGING

Scope:

all bu staff with an email

Type of Service:

application access protection

Charging Method:

based on unit of users (Actual usage)

PTS

PENETRATION TESTING SERVICE

Proactive Bug Hunting

DESCRIPTION

VAPT (Vulnerability Assessment and Penetration Testing) identifies and resolves security gaps in your IT infrastructure. Combining vulnerability assessments with simulated cyber-attacks, it's a critical step in meeting Central Group's security policies and preventing data breaches.

Our team provides detailed reports, collaborates with developers to fix issues, and offers unlimited free retesting to ensure all vulnerabilities are fully addressed.

CHARGING

Scope:

web & mobile applications, network and APIs

Type of Service:

vulnerability management

Charging Method:

man-days per engagement

VAS

VULNERABILITY ASSESSMENT SERVICE

Continuous Bug Hunting

DESCRIPTION

Continuous Security with Our Vulnerability Assessment Service

- Penetration testing offers a snapshot, but ongoing protection is essential. Our Vulnerability Assessment Service continuously detects vulnerabilities in your critical internet-exposed assets.

- Key Features:

- Automated Scanning: Assess up to 20 internet-facing assets, including web apps, VPNs, API gateways, and firewalls.
- Dynamic Testing (DAST): Scan one primary website for SQL injection, XSS, and CSRF vulnerabilities.
- Attack Surface Management (ASM): Analyze one top-level domain to find hidden assets and reduce your attack surface.

Monthly Reports:

- Receive actionable monthly reports to strengthen your security posture and stay ahead of emerging threats.

CHARGING

Scope:

critical internet facing assets

Type of Service:

vulnerability management

Charging Method:

flat rate per year

LMS

LEARNING MANAGEMENT SERVICE

Strong First Line

DESCRIPTION

Combining interactive security awareness training, informative webinars, and eye-catching e-posters with key security messages to keep employees informed, vigilant, and proactive in protecting valuable data and systems from evolving security threats. Furthermore, the program incorporates engaging phishing simulations to test their ability to identify and report suspicious emails. This comprehensive approach empowers employees to become active participants in protecting our valuable data and systems from cyber-attacks.

CHARGING

Scope:

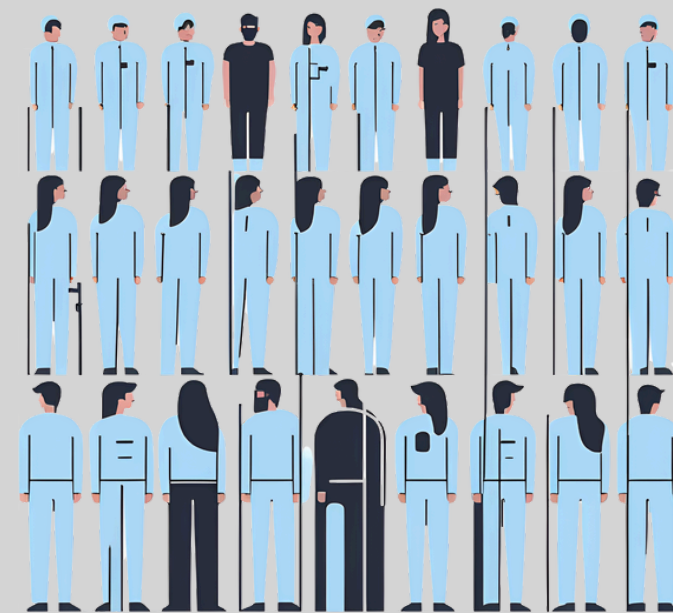

all bu staff with an email

Type of Service:

security & compliance

Charging Method:

based on unit of user (actual usage)

DEVSEC

DEVELOPER SECURITY TRAINING

Strong First Line

DESCRIPTION

Comprehensive training program and platform tailored to developers' needs, covering industry best practices for secure coding, vulnerability identification, and secure application design. This training equips your developers to build secure applications from the ground up, reducing the risk of security breaches and protecting your valuable data.

CHARGING

Scope:

sw developer, tester & qa, developer leads/managers, app & infra team, business analyst & system administrator

Type of Service:

security & compliance

Charging Method:

based on unit of user (actual usage)

SRC

SECURITY RISK & COMPLIANCE

Solid IT Governance

DESCRIPTION

A comprehensive governance framework to manage security risks and compliance, ensuring the organization stays secure and aligned with industry standards. This service focuses on three key areas:

1. **Compliance Program:** Develop and update security policies to meet industry best practices and regulations. Lead awareness campaigns, facilitate security control assessments, and provide compliance dashboards for easy tracking.
2. **Proactive Risk Management:** Implement IT security frameworks to identify and mitigate risks, leveraging incident data and testing results to improve security controls. Maintain risk dashboards to keep executives informed.
3. **Security Expert Advisory:** Offer guidance on secure IT implementations, architecture, and audit findings. Provide ad-hoc security expertise to address specific concerns.

CHARGING

Scope:

All BU staff with an email

Type of Service:

security & compliance

Charging Method:

based on unit of user (actual usage)

DPOAAS

DPO AS A SERVICE

Privacy by Design

DESCRIPTION

Provide Personal Data Protection Act (“PDPA”) consultation and PDPA documentation review (e.g., Record of Processing Activity (ROPA), Privacy Notice, and consent wording, etc.).

Conduct gap analysis and provide remedial action plan to ensure PDPA compliance.

Advice on handling Data Subject Right Request (DSR) and acting as an official point of contact with authority and data subject on all data protection matters.

Conduct a data breach assessment and notify Personal Data Protection Committee (PDPC) within 72 hours of becoming aware of the breach (if needed), including notifying data subject without undue delay (if needed).

Registration as DPO with PDPC and monitor/update related laws and regulations

CHARGING

Scope:

All BU staff with an email

Type of Service:

PDPA Compliance

Charging Method:

based on tiered model (BU size & No. of requests)

ROPA

PDPA INVENTORY & ROPA

Privacy by Design

DESCRIPTION

Provide and maintain PDPA inventory and ROPA management tool to assist all BUs in PDPA compliance.

CHARGING

Scope:

All Bu with ROPA management Tool

Type of Service:

PDPA Compliance

Charging Method:

based on unit of user record (fixed rate/annum)

DSR

DSR FULFILMENT

Privacy by Design

DESCRIPTION

Provide and maintain DSR management tool to assist BUs in DSR handling to comply with PDPA.

CHARGING

Scope:

Bu with JIRA ticketing

Type of Service:

PDPA Compliance

Charging Method:

based on unit of user record (fixed rate/annum)

VCISO

VIRTUAL CISO RISK ADVISORY

Effective Cyber Program

DESCRIPTION

Advisory, assessment, strategic and solution generation in a wide range of expert domains, including but not limited to: security and privacy roadmap planning, board and ac management advisory, policy and standards advisory, both regulatory and non-regulatory compliance advisory, risk advisory, new project consultation, privacy management, PDPA consultation, security risk assessment, security architecture review, third-party due diligence, penetration testing & wider vulnerability management program advisory, security operations management, incident management, business crisis management advisory ...

CHARGING

Scope:

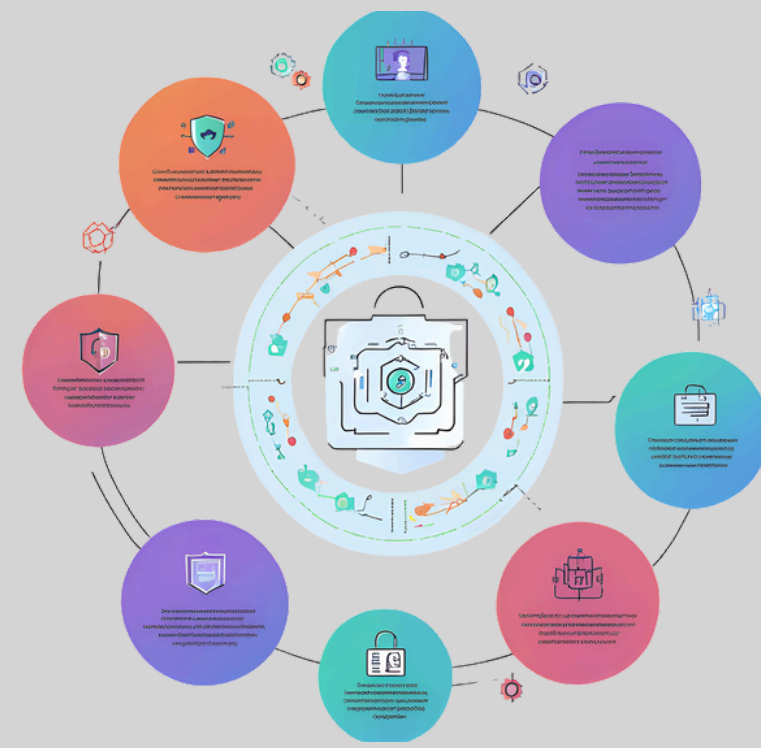

Central group wide

Type of Service:

risk Advisory

Charging Method:

based on percent allocation of overall service coverage
